- 25X1
- 25X1 1. [] Comment. The names mentioned belong to the chiefs of units which had previously been reported as ration supply depots of the GOFG and the army. Most of the names have been reported previously. []
- 25X1 2. [] Comment. In 1952, a monthly average of 250 to 300 carloads of flour was dispatched from the Wurzen area, while 108, 151, 190 and 136 carloads of flour were dispatched respectively in January through April. This indicates a decrease of 50 percent. As the ration supply depots of the GOFG and the army are well provided with flour, shipments possibly decreased as the result of an effort to ease the strained food situation in East Germany.
- 25X1 3. [] Comment. Food supply deliveries [] amounted to 74 carloads in March and 79 carloads in April and thus also show a declining tendency as compared with early 1953. []
- 25X1 The decrease of the volume of food deliveries is noteworthy inasmuch as, according to press reports, reparation deliveries could be postponed while deliveries to the Soviet Army had to be fulfilled.
